MS in Robotics & Autonomous Systems (Artificial Intelligence) (Fall '25) at Arizona State University | B.Tech in AI & ML @ SVKM'S NMIMS, MPSTME | AI Enthusiast | Robotics | Computer Vision | ML & Deep Learning

Tempe, Arizona, United States

Summary

Aspiring Robotics & AI Engineer | M.S. in Robotics & Autonomous Systems (AI) at Arizona State University | B.Tech in AI & ML from SVKM's NMIMS | Deep Tech Enthusiast & Innovator

I am currently pursuing my Master of Science in Robotics and Autonomous Systems (Artificial Intelligence concentration) at Arizona State University (ASU), building upon a strong foundation developed during my B.Tech in Artificial Intelligence & Machine Learning from SVKM's NMIMS MPSTME.

My academic and project journey has equipped me with robust expertise in machine learning, deep learning, computer vision, and intelligent automation. I've developed and deployed innovative solutions across domains, including:

Visual Question Answering (VQA) Model
Secure Online Banking System (DBMS)
Video Game Sales Prediction (ML)
Leaf Disease Detection (Deep Learning)
IoT-based Gesture-Controlled Bluetooth Speaker
Spam Email Detection (NLP)
Real-time Fruit Detection (Computer Vision)
AI-based Noise Cancellation Model

Technical Proficiencies:

Languages & Frameworks: Python, TensorFlow, scikit-learn, R, C
Big Data & Databases: SQL, NoSQL, Hadoop, Spark, Hive
Visualization & Tools: Tableau, MATLAB, AutoCAD, SolidWorks,
Jupyter Notebook, Google Colab, RStudio

☁️# Cloud & Deployment: Experienced in real-time data processing and ML model integration

I'm deeply passionate about Robotics, AI-driven perception systems, and intelligent automation, with a mission to build autonomous solutions that seamlessly integrate into human environments and enhance productivity.

Beyond academics, I'm a collaborative team player and athlete, actively involved in football and basketball at college and district levels — fostering resilience, leadership, and strategic thinking.

Driven by curiosity and innovation, I aim to leverage AI and robotics to design systems that bridge the gap between human intelligence and machine autonomy. Always open to connecting with like-minded professionals, researchers, and innovators shaping the future of intelligent systems.

Experience

ASU Mesh Labs

8 months

Volumetric Innovation Fellow

January 2026 - Present (5 months)

Phoenix, Arizona, United States

Working with immersive and volumetric technologies to support innovation, research, and creative projects within Meteor and the MESH Student Workforce at Arizona State University.

XR Quality Assurance and Testing

October 2025 - January 2026 (4 months)

Phoenix, Arizona, United States

Responsible for comprehensive Quality Assurance (QA) of cutting-edge Extended Reality (XR) applications (VR/AR/MR). I execute rigorous functional and performance testing, document and track defects, and collaborate with developers to ensure the stability and user experience of immersive systems for ASU's research. This role supports the creation of high-quality, reliable digital experiences.

Deloitte

Data Analytics Virtual Internship

July 2025 - July 2025 (1 month)

Ahmedabad, Gujarat, India

Excited to complete the Deloitte Data Analytics Virtual Internship via Forage!
Worked on real-world tasks using Microsoft Excel and Tableau for business-focused data analysis and dashboard creation.
Thanks to Deloitte and Forage for this hands-on learning experience!
#DataAnalytics #Tableau #Excel #VirtualInternship #Deloitte #Forage

Codec Technologies India
Artificial Intelligence Intern
January 2025 - July 2025 (7 months)
Ahmedabad, Gujarat, India

As an Artificial Intelligence Intern at Codec Technologies, I was actively involved in developing and implementing AI-driven solutions to support real-world business challenges. My role included working on machine learning models, data preprocessing, and model evaluation using Python and popular frameworks like TensorFlow and scikit-learn. I collaborated closely with project leads to research and prototype AI applications in domains such as computer vision and natural language processing. Additionally, I contributed to ongoing innovation by exploring emerging AI techniques and ensuring model performance aligns with project goals. This internship offered valuable hands-on experience and exposure to global standards in AI development and deployment.

Bacancy
Machine Learning Intern
January 2025 - May 2025 (5 months)
Ahmedabad, Gujarat, India

Worked as a Machine Learning Intern at Bacancy Technology, where I gained hands-on experience in developing and implementing AI models, data analysis, and contributing to innovative machine learning projects. Excited to be part of a dynamic team and enhance my skills in real-world applications of AI.

Education

Ira A. Fulton Schools of Engineering at Arizona State University
Master's degree, Robotics and Autonomous Systems (Artificial Intelligence) · (August 2025 - August 2028)

SVKM's NMIMS Mukesh Patel School of Technology Management & Engineering

Bachelor of Technology - BTech, Artificial Intelligence and Machine Learning · (August 2021 - May 2025)

The New Tulip International School
Higher Secondary · (June 2019 - May 2021)

Eklavya School, Ahmedabad
Secondary · (June 2016 - May 2019)
